Office Action Summary

Application No.

10/086,068

Applicant(s)

EVANS ET AL.

Examiner

Louis D Lieto

Art Unit

1632

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-142 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☐ Claim(s) ____ is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☒ Claim(s) 1-142 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-54, drawn to a method of treating rheumatoid arthritis, which comprises delivery of a DNA sequence to a host, classified in class 514, subclass 44.
- II. Claims 55-108, drawn to a method of treating systemic lupus erythematosus, which comprises delivery of a DNA sequence to a host, classified in class 514, subclass 44.
- III. Claims 109-130, drawn to drawn to a method of treating a connective tissue disorder, which comprises delivery of a DNA sequence to a host, classified in class 514, subclass 44.
- IV. Claims 131-142, drawn to a mammalian cell comprising a recombinant retroviral vector, which comprises a DNA sequence encoding IRAP, classified in class 435, subclass 325.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are patentably distinct inventions for the following reasons. In the instant case the different invention of group I is to a method of treating rheumatoid arthritis, group II is to a method of treating systemic lupus erythematosus, and group III is to a method of treatment of a connective tissue disorder. The diseases of groups I, II, and III are substantially different from each other, affecting different tissues and organs, involving different symptoms,

Art Unit: 1632

have different frequencies of occurrence, and different ages of onset. None of the inventions requires the others.

Inventions I-III and IV are patentably distinct inventions for the following reasons. In the instant case the different inventions of groups I-III are to methods of treating disease, while the invention of group V is to a mammalian cell comprising a recombinant retroviral vector, which comprises IRAP. The methods of treating disease of groups I-III can be practiced without the mammalian cell of group IV. Further, the mammalian cell of group IV can be used as an *in vitro* research tool in a manner unrelated to the study of disease.

Furthermore, searching the inventions of groups I-III and IV together would impose a serious search burden. In the instant case, the search of methods of treatment of disease and the mammalian cells are not coextensive. The inventions of Groups I-III and IV have a separate status in the art as shown by their different classifications. As such, it would be burdensome to search the inventions of Groups I-III and IV together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and because each requires a separate search of the prior art, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention: The inventions of groups I -IV list the following patentably distinct species of vectors in which the DNA sequence is subcloned:

a) non-viral vector

- b) a retroviral vector
- c) adenovirus vector
- d) an adeno-associated vector
- e) herpes simplex virus vector
- f) an SV40 vector
- g) polyoma virus vector
- h) papilloma virus vector
- i) picornavirus vector
- j) vaccinia virus vector

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-130 are generic.

The inventions of groups I-III list the following patentably distinct species of DNA sequences encoding a biologically active gene product:

- a) IL-1 receptor antagonist protein
- b) IL-4
- c) IL-10
- d) IL-1 soluble receptor
- e) TNF α soluble receptor
- f) TIMP
- g) soluble ICAM-1

Art Unit: 1632

- h) soluble CD44
- i) soluble CD18
- j) superoxide dismutase
- k) IGF α
- l) TGF β
- m) collagen
- n) IRAP

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-130 are generic.

The inventions of group III list the following patentably distinct species of connective tissue diseases or disorders:

- a) Sjorgen's syndrome
- b) polymyositis-dermatomyositis
- c) systemic sclerosis
- d) vasculitis syndromes
- e) juvenile rheumatoid arthritis
- f) ankylosing spondylitis
- g) psoriatic arthritis
- h) osteoporosis
- i) osteogenic imperfecta

j) Paget's disease

k) inflammatory bowel disease

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 122-130 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Lou Lieto whose telephone number is (571) 272-2932. The examiner can normally be reached on Monday-Friday, 9am-5 pm.

Art Unit: 1632

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Amy J Nelson can be reached on (571) 272-0804. The fax phone number for the organization where this application or proceeding is assigned is (703)-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Patent applicants with problems or questions regarding electronic images that can be viewed in the PAIR can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
